Your First Quarter

Retro Cronulla · Local SEO, Google Maps and AI search across Month 1, 2 and 3

What we're aiming at

More people in and around Cronulla finding Retro on Google, Google Maps and AI assistants, and more of them booking a table.

- Month 1 fixes the Google profile, puts the menu on the website as real pages, and gets website tracking working again
- Month 2 adds the functions and bottomless pages ahead of Christmas, and lists Retro on the sites Google and AI assistants read
- Month 3 measures Maps, search and AI answers again against today's numbers, and keeps building content
- Everything measured against today's baseline, the numbers on the following pages

99,485	8,858	13%	0
Google profile views, May to October	Website clicks from the profile, same period	AI answers that name Retro, 5 of 40	Website visits recorded since 13 Oct

The problem this fixes. Most people meet Retro through its Google profile, and the profile is doing well on stars. But Google files Retro as a "Fusion restaurant", the website is one page with the menus locked in PDFs, and website tracking stopped when the new site went live on 12 October. So Google has little to match Retro to pizza, Mexican or bottomless searches, and we can't yet count bookings from the site. Month 1 fixes all three.

Quarter at a glance

MONTH 1 · MILESTONE 1

Foundation

Profile correct, menu readable, every booking click counted.

- Category, hours, menu link
- Menu, drinks, specials pages
- Tracking back on

MONTH 2 · MILESTONE 2

Optimise

Christmas pages live, Retro listed where diners look.

- Reviews and weekly posts
- Functions, bottomless pages
- TripAdvisor and guide listings

MONTH 3 · MILESTONE 3 & 4

Compound

Maps, bookings and AI answers measured against today.

- Maps positions vs today
- Bookings vs Month 1
- AI answers re-checked

Month 1, week by week

1	2	3	4
Profile & tracking	**Menu page**	**Drinks & specials**	**First read**
Category, hours, tracking	Food menu as text	Pages, schema, sitemap	Reported back to you

Reporting · a short update every Monday, a monthly performance report, and your live online hub

Prepared by Mars Design

THE BIG PICTURE

How Customers Find You Now

Where diners look before they book, and where Retro stands in each place

Choosing where to eat used to start with a search and end on a website. Now most of it happens before anyone reaches the website: on the Google profile, in the Maps pins, in reviews, and increasingly in an AI assistant's answer to "where should we eat in Cronulla tonight?".

BEFORE AI

One path

How most restaurants still think about marketing.

- Search the restaurant
- Visit the website
- Book a table

AFTER AI · THREE LAYERS	RETRO TODAY	STATUS
DISCOVERY · BE FOUND		
Google profile and Maps	99,485 views since May	IN PLACE
Correct categories	Listed as Fusion	THIS QUARTER
Menu and specials pages	PDFs only	THIS QUARTER
Maps ads	Not running	OPTIONAL

Local guides and listings	Shire Scout yes, TripAdvisor no	THIS QUARTER
AI-readable website	No sitemap or llms.txt	THIS QUARTER
Helpful guides	None yet	LATER

Discovery + Trust + AI search. One system. Retro's stars and reviews are already strong, which is why it wins the broad "restaurants cronulla" search on Maps. What's missing is the detail Google and AI assistants need to recommend Retro for the specific things it does: wood-fired pizza, Mexican, margaritas, bottomless pizza and group bookings.

Status taken from the research on the following pages: Google Business Profile performance (May to October 2026), the live website, weekly AI answer tracking (week of 19 Oct 2026) and live Google searches, 21 Oct 2026.

MONTH 1 · GOOGLE MAPS

Your Google Profile

How people find Retro on Google today, and what we're changing first

First, the fix. Google lists Retro as a "Fusion restaurant". Pizza is only the 10th most common search that shows Retro's profile, behind "mexican cronulla" and "cronulla food", even though wood-fired pizza is the main dish. Changing the main category to Pizza restaurant, with Mexican restaurant, Cocktail bar and Bar added, tells Google what Retro actually serves. It can be set back at any time.

The profile today

MEASURE	MAY TO OCT
Profile views	99,485
Searches that showed Retro	51,518
Website clicks	8,858
Menu views	2,538
Direction requests	1,459
Calls	613
Bookings through Google	0

What people searched

SEARCH	TIMES
cronulla restaurants	6,990
restaurants	5,429
restaurants cronulla	3,860
retro	2,240
mexican cronulla	1,598
cronulla food	1,184
pizza cronulla	808

Google Business Profile performance, May to October 2026 (October part month). 84% of profile views came from phones: 66% Google Search on mobile and 18% Google Maps on mobile.

What we'd change on the profile

WHAT WE FOUND	WHY IT MATTERS	PRIORITY
Main category is "Fusion restaurant".	Categories decide which searches Retro can appear for. Pizza, Mexican and cocktail searches are where it is missing out.	HIGH
Menu link points to the old website's file host.	The menu link should open the new menu page, so the 2,538 people viewing the menu land on the current version.	HIGH
Tuesday and Wednesday show 4:30pm opening.	The venue opens at 5pm, as the website says. Wrong hours lose trust with diners and with Google.	HIGH
8 new reviews flagged on the profile.	Replying to every review is one of the signals Google uses to rank Maps results.	MED
Five weekly specials ready to post.	Taco Tuesday, bottomless pizza Wednesday, the Thursday deal and the happy hours each make a post that keeps the profile active.	MED
Bookings counted as 0.	The reservation link goes out to nowbookit, so Google can't count it. We count booking clicks on the website instead.	MED

MONTH 1 · THE SEARCHES

Keywords We're Focused On

Real Google numbers, and where Retro shows for each one today

How often each search happens in a month, where Retro sits in the Google Maps results, and where it sits in the normal Google results below the map. The gap between the last two columns is the opportunity.

KEYWORD	SEARCHES/MO	GOOGLE MAPS	GOOGLE SEARCH	PRIORITY
RESTAURANTS AND DINNER				
restaurants cronulla	12,100	1st	41st	HIGH
best restaurants cronulla	1,600	1st	Not top 10	HIGH
dinner cronulla	880	1st	7th	MED
PIZZA				
pizza cronulla	880	Not top 3	19th	HIGH
pizza sutherland shire	880	Not top 3	Not top 100	HIGH
best pizza cronulla	110	3rd	21st	MED
MEXICAN				
mexican cronulla	590	Tracking now	8th	HIGH
mexican restaurant cronulla	140	2nd	18th	MED
BARS AND DRINKS				
bars cronulla	1,000	1st	19th	HIGH
cocktail bar cronulla	110	1st	28th	MED
BOTTOMLESS AND FUNCTIONS				
bottomless brunch cronulla	260	Not top 3	Not top 10	MED
bottomless pizza	90	Tracking now	Tracking now	TEST
function venues cronulla	50	Tracking now	Tracking now	TEST

The big one. "Restaurants cronulla" is searched about 12,100 times a month, more than ten times as often as any single dish. Retro already sits first on the map for it near the venue, but 41st in the results below the map, where list sites like Shire Scout and TripAdvisor take page one. Getting Retro onto those lists is how it reaches the people who scroll past the map.

Small numbers that still matter. Searches like "tacos cronulla" and "margaritas cronulla" are below Google's reporting threshold, and Retro already ranks well for them. They are also the questions people ask AI assistants, so they stay on the tracking list.

Search volumes: Google Keyword Planner, Australia, 12-month average (Oct 2025 to Sep 2026), pulled 21 Oct 2026. Maps and search positions: rank tracking in your online hub, 13 to 20 Oct 2026, checked from Cronulla; "best restaurants cronulla", "mexican cronulla" and the bottomless searches from live Google searches and Search Console, 21 Oct 2026. Maps results change with where the searcher is standing.

MONTH 1 · GOOGLE MAPS

Who's On The Map

The three pins Google shows for the searches that matter to Retro

The map pack, search by search

SEARCH	TOP 3 ON THE MAP	RETRO
restaurants cronulla	Retro, ISORA, Bobbys Cronulla	1ST
best restaurants cronulla	Retro, ISORA, Bobbys Cronulla	1ST
dinner cronulla	Retro, Bobbys Cronulla, Benny's Cronulla	1ST
cocktail bar cronulla	Retro, Bar Las Chicas, The Blind Bear	1ST
pizza cronulla	Arthur's Pizza (4.6, 58 reviews), Retro (4.9, 93), Queen Margherita of Savoy (4.6, 481)	BORDERLINE
mexican restaurant cronulla	El Rey, Zambrero, Checho's	BORDERLINE
bottomless brunch cronulla	Bar Las Chicas, El Rey, Meadow Music Room	NOT SHOWN
christmas party venues cronulla	Event venues and hotels, no restaurants	NOT SHOWN

Live Google searches from Sydney, 21 Oct 2026. "Pizza cronulla" and "mexican restaurant cronulla" give different answers depending on where the search is made (Retro shows in the top 3 from some spots and not others), so both sit on the edge.

Who wins the searches Retro misses, and why

Queen Margherita of Savoy

481 REVIEWS · PIZZA CATEGORY

Five times Retro's review count, and Google files it as a pizza restaurant, so it is a natural answer to every pizza search.

El Rey

LEADS MEXICAN AND BOTTOMLESS

Categorised as Mexican, with a website that ranks for over 200 searches. It shows for both Mexican and bottomless brunch.

Bar Las Chicas

BOTTOMLESS AND COCKTAILS

SE Ranking rates it Retro's closest competitor online, alongside El Rey. It shows on the map for both bottomless brunch and cocktail bar searches.

Arthur's Pizza

58 REVIEWS · PIZZA CATEGORY

Fewer reviews and lower stars than Retro, but its category says pizza. Proof the category is doing the work.

The pattern. Retro wins the broad searches on stars and reviews. It loses the specific ones where the category and the words on the profile decide: Mexican, bottomless and functions. The fix is categories, menu items, weekly posts about the specials and pages for each, not more reviews alone.

Optional: ads on the map. On a phone, the map takes most of the screen and the top pins are often sponsored. SEO moves Retro up the free results over time. A one to two month Maps ad trial, with $500 to $1,000 a month of ad spend paid to Google, puts Retro in the sponsored pins straight away for searches like "pizza cronulla". Setup and management are quoted separately.

THE RESEARCH · PART 1 OF 3

Website & SEO Health

What we found reviewing retrocronulla.com.au

A one-page site, rebuilt and live on the domain since 12 October. People reach it mostly from the Google profile and by searching Retro's name, on their phones. It has about 230 words of text, and everything about the food and drinks sits in five PDF menus.

952
Clicks from Google search, 4 to 19 Oct

73%
Of those from people searching Retro's name

78%
Of clicks on a phone

3/100
Domain trust, 6 websites linking in

What's already working

ASSET	WHY IT MATTERS
A clear page title	"Retro Cronulla | Pizza, Tacos & Tequila Bar in Cronulla" names the food, the bar and the suburb, which is what Google reads first.
Specials on the page	The weekly specials and happy hours are now written on the site as text, so Google can read them.
Booking button up front	The nowbookit button is easy to find. Once tracking is back on, each click becomes a measurable booking.

What we'd fix first

WHAT WE FOUND	WHY IT MATTERS	PRIORITY
No Google Analytics on the new site. Visits have recorded as zero since 13 October.	Without it we can't count visits or booking clicks, the numbers this whole plan is measured on.	HIGH
Menus are PDFs only. Food, set menus, bottomless, drinks and drinks packages.	Google can barely read PDFs and AI assistants mostly skip them. Dishes on a page give them something to quote.	HIGH
One page for everything.	One page can only rank for a few searches. A page each for the menu, drinks, specials and functions gives Retro more chances.	HIGH
No restaurant details in the site code.	This background code tells Google and AI tools the hours, menu, address and booking link in a form they read directly.	MED
No sitemap or llms.txt. Both addresses return "not found".	A sitemap helps Google find new pages quickly. An llms.txt file gives AI tools a short summary of the venue.	MED
"Wood-fired" isn't on the site.	It is how people describe the pizza they want, and it sets Retro apart from takeaway pizza.	MED

Reviewed directly: live page and page source, 21 Oct 2026. Clicks from Google Search Console, 4 to 19 Oct 2026 (the property's first data). Domain trust and links from SE Ranking, Australia, October 2026. Google Analytics property checked 21 Oct 2026.

THE RESEARCH · PART 2 OF 3

Who Else Shows Up

The Cronulla restaurant search, below the map, right now

How you compare

WEBSITE	DOMAIN TRUST	SEARCHES RANKED	EST. FREE VISITS/MO
retrocronulla.com.au (you)	3	177	145
pippiscronulla.com.au	20	280	372
qmos.com.au	46	223	369
ilgustorestaurant.com.au	6	341	240
elrey.com.au	4	217	169
isora.com.au	3	95	120
barlaschicas.com	11	129	88

SE Ranking, Australia, October 2026. Visit figures are SE Ranking estimates, useful for comparison. Retro's real clicks from Search Console are higher. El Rey ranks for more searches than Retro with similar domain trust, so this is about pages, not only authority.

Who's ranking for "restaurants cronulla", and why

Shire Scout
PAGE ONE IN EVERY SEARCH WE RAN

The local guide for the Shire, first in four of our eight searches. It already has a Retro page, and AI assistants cite it more than any site except Google.

TripAdvisor
RANKS #1

A "best restaurants in Cronulla" list. We found no Retro listing, so Retro can't appear in it.

Broadsheet, AGFG, OpenTable
PAGE ONE LISTS

Editorial guides and booking sites with "best of Cronulla" pages. Retro isn't on any of them yet.

Mums of the Shire
RANKS FOR BOTTOMLESS

Already features Retro in its bottomless lunch round-up and a Mother's Day post. Good mentions to build on.

The pattern. Below the map, page one belongs to lists, not restaurant websites. Retro gets onto that page by being in the lists: claimed on TripAdvisor, listed on OpenTable, AGFG and Zomato, and pitched to the editorial guides. Each listing also feeds the AI answers.

Listings, current state

LISTING	STATUS	NOTE
Google profile, Shire Scout, Instagram	LIVE	Shire Scout and Instagram both cited by AI assistants.
TripAdvisor, OpenTable, AGFG, Zomato	NOT LISTED	Restaurant sites that rank on page one and feed AI answers.
Broadsheet, Time Out, Good Food	PITCH	Editorial guides, added by invitation after a short note to the editor.

THE RESEARCH · PART 3 OF 3

The Wider Territory

Pages to build, AI search, and Month 1 channel by channel

Pages to build, and the questions they answer

PAGE	SEARCHES AND AI QUESTIONS IT SERVES	WHEN
Food menu	"pizza cronulla", "pizza sutherland shire" (880 a month each), "best wood fired pizza in the Sutherland Shire"	Month 1
Drinks and happy hour	"bars cronulla" (1,000), "cocktail bar cronulla", "where can I get tacos and margaritas in Cronulla"	Month 1
Bottomless	"bottomless brunch cronulla" (260), "where to go for bottomless lunch in the Sutherland Shire"	Month 2
Functions and Christmas	"function venues cronulla", "fun restaurants for a group dinner in Cronulla"	Month 2

AI search. We ask ChatGPT, Gemini, Perplexity and Google's AI answers nine questions a week, such as "best pizza in Cronulla" and "where should I eat near Cronulla beach tonight". Retro is named in 5 of 40 answers (13%). The sites they cite most are Google (25% of citations), Shire Scout (21%), Retro's own site (11%), Time Out (9%), Best Restaurants Australia and Instagram (8% each) and OpenTable (7%). Menu pages and those listings are what get Retro named more often.

Month 1, channel by channel

WEEK	WEBSITE	GOOGLE PROFILE	LISTINGS & AI
Week 1 26 Oct	Tracking back on, booking clicks counted	Category, hours, menu link	AI baseline recorded
Week 2	Food menu page live	Description, attributes, first weekly post	TripAdvisor claimed
Week 3	Drinks and specials pages, site code, sitemap	Review replies caught up	OpenTable, AGFG, Zomato
Week 4	Functions page drafted for review	Melbourne Cup and Christmas hours	First read reported back

What we need from Retro. A yes to the category change, and, for the functions page, whether Retro takes private or exclusive bookings and the largest group it can seat.
